

The Directors of Pacific Capital UCITS Funds plc (the “**Company**”) whose names appear in the “**Directory**” of the Prospectus accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement and the Prospectus is in accordance with the facts and does not omit any material information likely to affect the import of such information.

LOCKHART ASSET MANAGEMENT ALTERNATIVES AND REAL ASSETS FUND

(A sub-fund of Pacific Capital UCITS Funds plc, an investment company with variable capital incorporated with limited liability in Ireland with registered number 553111, established as an umbrella fund with segregated liability between sub-funds and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended))

SUPPLEMENT NO. 24

**MANAGEMENT COMPANY
WAYSTONE MANAGEMENT COMPANY (IE) LIMITED**

**INVESTMENT MANAGER
LOCKHART ASSET MANAGEMENT¹
DATED 4 OCTOBER 2024**

This Supplement dated 4 October 2024 forms part of, and should be read in the context of and together with, the Prospectus dated 31 May 2024 as may be amended from time to time (the “**Prospectus**”) in relation to the Company and contains information relating to the Lockhart Asset Management Alternatives and Real Assets Fund which is a sub-fund of the Company.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement. In the event of any conflict between the Prospectus and this Supplement, this Supplement shall prevail.

¹ Lockhart Asset Management is an approved trading name of Pacific Capital Partners Limited by its regulator, the UK Financial Conduct Authority.

DEFINITIONS

Any words or terms not defined in this Supplement have the same meaning given to them in the Prospectus. The Fund is established pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (“**UCITS Regulations**”) and this Supplement will be construed accordingly and will comply with the Central Bank UCITS Regulations.

“**Business Day**” means:

- (i) any day (except Saturday or Sunday) on which the banks in Ireland and the United Kingdom are open for business; or
- (ii) such other day or days as may be determined from time to time by the Directors and notified in advance to Shareholders;

“**Dealing Day**”, being the day upon which redemptions and subscriptions occur, means

- (i) each Business Day; and / or
- (ii) any other day which the Directors, in consultation with the Manager, have determined, subject to advance notice to all Shareholders in the Fund and provided there is at least one Dealing Day per fortnight;

“**Fund**” means the Lockhart Asset Management Alternatives and Real Assets Fund;

“**Redemption Cut-Off Time**” means 10:00 am (Irish Time) on the relevant Dealing Day;

“**Retail Share Classes**” means Class A and Class B Shares;

“**Subscription Cut-Off Time**” means 10:00 am (Irish Time) on the relevant Dealing Day;

“**Valuation Day**” means each Dealing Day, unless otherwise determined by the Directors;

“**Valuation Point**” means 9:00 pm (Irish Time) on each Valuation Day or such other time after the Redemption Cut-Off Time and Subscription Cut-Off Time as the Directors, in consultation with the Manager, may determine in respect of the Fund from time to time and as notified in advance to Shareholders.

THE FUND

The Lockhart Asset Management Global Alternatives and Real Assets Fund is a sub-fund of Pacific Capital UCITS Funds plc, an investment company with variable capital incorporated in Ireland with registered number 553111 and established as an umbrella fund with segregated liability between sub-funds.

Pacific Capital Partners Limited (UK Company number: 02849777) is a private limited company established on 1 September 1993, with registered offices at 74 Wigmore Street, London, W1U 2SQ, United Kingdom to provide investment management services (the "**Investment Manager**"). Full details of the Investment Manager are set out in the Prospectus in the section titled "*Investment Manager*". Lockhart Asset Management is an approved trading name of the Investment Manager by the Financial Conduct Authority, its primary regulator in the UK.

The Company currently offers 24 Classes of Shares in the Fund as set out below. The Company may, following consultation with the Manager, also create additional Classes of Shares in the Fund in the future with prior notification to, and clearance in advance by, the Central Bank.

Share Class Description	Class Currency	Currency Hedged	Investment Management Fee	Distribution Fee	Minimum Initial Subscription*	Minimum Holding*
Accumulating						
Class A Shares						
USD A Accumulating Hedged	USD	Yes	Up to 1.50% of NAV per annum	Up to 0.50% of NAV per annum	USD 50,000	USD 50,000

---------------------------------	-----	-----	------------------------------------	------------------------------------	------------------	---------------

* The Directors may, in consultation with the Manager, waive the Minimum Initial Subscription and Minimum Holding for each Class of Shares.

Shares are only available for investment by investors who are clients of Lockhart Capital Management LLP having its registered office at 71 Queen Victoria Street, London, EC4V 4BE.

The Base Currency of the Fund is Sterling. The Net Asset Value per Share of each relevant Class will be calculated in its currency of denomination.

The Fund may as a matter of policy, use portfolio management techniques (including currency forwards) set out in Appendix C to the Prospectus to endeavour to protect the holders of non-Sterling denominated Classes against movements in the exchange rate between Sterling and the US Dollar, and the Euro and Sterling, There can be no assurance that such foreign exchange transactions will protect the holders of non-Sterling denominated Shares from any adverse movements in exchange rates.

Please see the “Risk Considerations – Share Currency Designation Risk” section of the Prospectus for further details. Where currency related transactions are utilised for the benefit of a Hedged Class, their cost and related liabilities and / or benefits will be for the account of that Class only. Accordingly, such costs and related liabilities and / or benefits will be reflected in the NAV per Share for Shares of any such Class.

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The Fund's investment objective is to provide a total return through a combination of capital growth and income over the long term (5 years +). The Fund also aims to provide a diversified return profile when compared against traditional global equity and global fixed interest markets. Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a 5 year, or any, period.

Investment Strategy

The Fund is a fund of funds and will seek to achieve its objective primarily through investment in underlying funds, including open-ended exchange traded funds, real estate investment trusts or closed ended funds (each an "**Underlying Fund**") which provide exposure mainly to alternative and/or real assets worldwide.

The Investment Manager regards 'alternative assets' and 'real assets' as those asset classes which are complementary to traditional global equity and bond investments. This may consist of certain 'niche' asset classes or sectors, such as companies or issuers in the real estate or infrastructure sectors or by taking exposure to certain investment strategies which are intended to generate a positive return, even when markets are volatile, flat or falling (for example by taking a combination of long and short positions in respect of underlying issuers) or which can take exposure to exchange traded commodities, real-estate exposure, infrastructure investment, inflation linked bonds, contingent convertible bonds, asset-backed securities (which are created from pooling non-mortgage assets together and are then sold to interested investors), mortgage-backed securities (which are securities created from pooling mortgages together and are then sold to interested investors), private market debt (which are loans that are not provided by banks or public markets and instead provided by private markets) and equity.

The alternative and real-asset categories invested in by the Fund may be summarised as follows:

- a) **Alternative Assets.** The term 'alternative assets' includes investment in Underlying Funds pursuing hedge fund strategies (including long/short, market neutral, event-driven, global macro, trend-following or other strategies as described in further detail below. It may also encompass exposure to categories of debt or fixed income which are not traditional investment grade, sovereign or corporate debt. In the context of the Fund, investments in this category includes high yield debt, securitised credit, convertible debt and Emerging Market Debt.
- b) **Real Assets.** Investments in this category include investments in listed stocks or debt instruments of companies which are engaged in the real estate, infrastructure or natural resources sectors and in Real Estate Investment Trusts (REITS) as outlined below or which take UCITS eligible exposure to commodities (through commodity indices which meet the requirements of the UCITS Directive and/or exchange traded commodities). The Fund may also invest in assets which provide an inflation linked or "real" return, such as inflation-linked bonds.

The exposures outlined above may, where appropriate, be achieved directly, through financial derivative instruments or through Underlying Funds, each as described in further detail herein. The Underlying Funds shall only take such exposure in a manner that complies in all respect with the UCITS Regulations and the Central Bank UCITS Regulations. The Fund may only invest in commodities, contingent convertible bonds, private market debt and real estate indirectly. The Fund's exposure to contingent convertible bonds and to private market debt shall not exceed 10% of Net Asset Value in each case.

The Fund may invest directly in certain securities (as detailed below in the section titled "Direct Investment") where it believes that such direct investment to be more efficient (e.g. where direct investment results in lower costs or increased liquidity) than investment in Underlying Funds as set out in the section entitled "*Direct Investment*". Such direct investment may be in equities or fixed income instruments.

While the allocation between direct investments and investment through Underlying Funds may vary over time in response to market events or other factors deemed relevant by the Investment Manager, it is anticipated that investment through Underlying Funds will exceed 51% of the Net Asset Value of the Sub-Fund at any given time. The decision to invest directly or indirectly via Underlying Funds in an asset will be driven by what the Sub-Investment Managers deems to be the most optimal route for each particular investment, based on factors including, among others, the opportunity set, cost of implementation, target risk and target return.

The Fund is not managed to or constrained by a benchmark, and nor does the Investment Manager use a benchmark in order to assess performance. This allows the Fund to be unconstrained in its allocation to, for example, countries, geographic regions, industry sectors, investment strategies and styles. Being unconstrained by a benchmark protects the Fund from needing to react to short-term benchmark changes, which may be sub-optimal for longer-term performance.

The Investment Manager will have regard to the overall balance of the Fund, typically maintaining a well-diversified exposure, through investments within Underlying Funds and directly, across geographic regions, industry sectors, investment strategies and styles. The allocations may fluctuate over time depending on prevailing risks and opportunities. This diversification provides an increased ability to perform across a variety of possible/futures outcomes, rather than being single-outcome dependent on an unknowable future.

Save as set out herein, the Fund has no bias to any country or region and, subject to the investment restrictions, provides exposure to investments which are listed or traded on Regulated Markets globally. The Fund has no bias to any industry or economic sector focus and as such weightings in these may vary as required in light of the Investment Manager's assessment of investment opportunities.

The Fund and the Underlying Funds in which it invests may make significant use of derivatives for investment purposes and for efficient portfolio management. The Fund will use hedging strategies to reduce risk over the short term without materially altering its risk profile. The Fund will also have the ability to invest outside of alternative assets in equity securities, equity related securities, more traditional debt securities (including those issued by corporate bodies, governments and/or supranational institutions).

An investor should consider their investment decision carefully before allocating a substantial proportion of an investment portfolio to the Fund. Given the nature of the Fund as a fund of funds, investors should have regard to the section under the heading "Investment Risks" in the Prospectus and the section of this Supplement titled "Risk Considerations". There can be no assurance that the Fund's investments will be successful or that the investment objectives of the Fund will be achieved.

Investment Strategies pursued by the Fund

As noted above, the investment strategies pursued by the Fund may be broadly described as falling into the categories of "alternative assets" and "real assets" and further detail in relation to each of these categories is set out below. The Fund may invest either directly or through Underlying Funds in implementing the strategies below.

The detailed disclosure below sets out information in relation to the investment strategies to which the Investment Manager may take exposure when constructing the portfolio. These investment strategies are commonly applied investment strategies deployed by professional investment managers, particularly in the 'alternative asset' space and there is a broad range of Underlying Funds which offer a range of exposures to these investment strategies. A fund pursuing alternative investment strategies will often deploy a number of these categories at the same time and the intention is that the Fund will have the ability to choose such combination of strategies that the Investment Manager believes to be the most appropriate at any time, depending on factors such as market conditions and its own investment analysis of market opportunities. For example, the Investment Manager might seek to take increased exposure to long-short or market neutral strategies in times of market volatility, such that the Fund may be protected from the risk of a general fall in market valuations, while it may increase its usage of Event Driven strategies in market conditions where there is increased activity in corporate merger and acquisition transactions. It may reduce its exposure to Trend Following strategies in

circumstances where significant market dislocation raises the risk of governmental, national central bank or regulatory intervention in markets, which could have an immediate impact on asset classes which were otherwise rising or falling in value (an example might be significant interest rate changes or a governmental decision to commence or to cease a support programme for certain industries or market participants). The Fund may increase its exposure to Real Asset Strategies (all of which offer a form of protection against inflation risks) in times of increased inflation across target markets. The Investment Manager believes that the portfolio of Underlying Funds in which it invests will offer a diversified allocation to some or all of the investment strategies described below over time but it will seek to opportunistically vary its exposure in response to its evaluation of market developments as outlined above.

While there is no fixed percentage allocation to strategies in the Supplement and the range may vary from time to time, the Fund shall typically have a 50% allocation to "Alternative Asset Strategies" and a 50% allocation to "Real Asset Strategies". In certain circumstances, the Investment Manager may increase the allocation to either category of strategy in response to market developments and its view as to the best investment opportunities for the Fund. However, it is not expected that the percentage allocation would exceed 70% / 30% in either direction.

Alternative Asset Strategies

The alternative investment strategies to be applied by the Fund and the Underlying Funds in which it invests shall include equity long/short, market neutral, event-driven, global macro, trend-following, relative value or other strategies as described below. Each of these strategies are commonly used by investment managers pursuing alternative investment strategies and generally take long and short positions (i.e., positions which allow the Fund to make a profit where an underlying asset falls in value) through liquid derivative instruments (such as futures and options on market indices) (as described in further detail below in the section titled "Investment Instruments to be used by the Fund – Derivatives").

Equity Long / Short

These strategies generally use fundamental and quantitative analysis to invest in publicly traded equities, such as shares, and take long and short positions to seek to capture perceived security mispricings (e.g. by taking long positions in respect of securities that the investment manager considers to be undervalued and which should accordingly rise in value over time and short positions in respect of securities that the investment manager considers to be overvalued and should accordingly fall in value over time). Portfolio construction is driven primarily by fundamental research into the equities and their issuers, although macro-economic analysis may also be applied. Fundamental analysis is a method of evaluating an individual security that entails attempting to measure its intrinsic value by examining related economic, financial and other factors. Quantitative analysis attempts to identify mispricing through the application of statistical and mathematical approaches to data.

Market Neutral

A market-neutral strategy is a type of investment strategy that seeks to profit from both increasing and decreasing prices in one or more markets while attempting to completely avoid some specific form of market risk. Market-neutral strategies are often attained by taking matching long and short positions in different stocks to increase the return from making good stock selections and decreasing the return from broad market movements. In this manner the strategy seeks to profit from both increasing and decreasing prices in the relevant financial markets and to have a low positive correlations to general market risk.

Event Driven

These strategies aim to capitalise on the opportunities associated with uncertainty around specific events. "Events" could include a range of corporate actions, or events such as mergers and acquisitions. For example a merger arbitrage trade seeks to profit on the difference between the price of the securities issued by a company that is the subject of a merger and the price proposed for that company as part of the merger. This strategy purchases (or synthetically sells short) securities of the target or subject of an announced merger and, subject to the deal type, synthetically shorts (or buys) the consideration being paid by the purchaser to the shareholders of the target company upon completion of merger transaction.

Macro

Macro strategies are directional trading strategies, which generally fall into one of two categories: global macro strategies and managed futures strategies. Global macro strategies (also known as GTAA strategies) seek to profit from long and short positions in any of the world's major capital markets (fixed income, currency, equity, commodities and other instruments) and have regard to broader factors such as government policy, global economic trends and indicators, political stability and other factors which are of general application, rather than examining individual securities or issuers on a case-by-case basis. This is sometimes described as a "top-down" global approach. Investment managers pursuing a macro strategy may invest in multiple markets in anticipation of expected market movements. Many global macro strategies primarily trade in the more liquid instruments in order to keep their trading activities flexible. Managed futures strategies seek to profit from investments in listed bond, currency, equity and commodity futures markets globally. Also referred to as Commodity Trading Advisors (CTA), these managers tend to follow model based systematic trading programs. The most common trading programs can be characterised as medium or long-term trend following that tend to invest with directional trends while using stop-loss limits to control risk. Other common trading programs include short-term counter trend programs (which seek to make gains by trading against current market trends) and hybrid systematic/discretionary programs (which involves a mix of automated systems and discretionary input).

Trend Following

This trading strategy aims to exploit behavioural biases within markets that lead to predictable price patterns over time. A typical price pattern would be a trend, where either rising prices continue to rise or falling prices continue to fall. The strategy captures the benefits of diversification by investing in a broad range of liquid securities across asset classes, and through careful in-built risk management techniques such as the monitoring of volatility within relevant markets (which can impact on momentum of investments) and assessing whether there has been a decrease in price momentum for individual investments.

Relative Value

This is a broad category, generally encompassing strategies that are non-fundamental and non-directional, and often quantitatively driven (i.e., investment is on the basis of statistical and mathematical analysis of data). Investment managers in this strategy typically use arbitrage to exploit mis-pricings and other opportunities across various asset classes, geographies and time horizons. Relative value strategies are often implemented by simultaneously buying and selling the different securities, thereby allowing the investor to potentially profit from the "relative value" of the two securities. Positions may be taken by direct investment or through derivative instruments, with the investment manager taking a long position in relation to the security which it believes to be overvalued and a short position in relation to the security it believes to be undervalued. Investment managers employing relative value strategies frequently focus on capturing the variance in price between two assets, while maintaining a neutral exposure to other factors, for example to geography, changes in interest rates, equity market movement and currencies.

Volatility

This strategy is based on the belief that the demand for option-based protection in the market results in the long-run positive spread of implied volatility over realised volatility (i.e., those engaged in the purchase of option based protection generally expect volatility to be higher than has historically proven to be the case). Volatility strategies exploit this fact by systematically selling options and hedging out the resulting exposure to the underlying market ("delta hedging"). Diversification is achieved by implementing the strategy across multiple asset classes.

Carry

In a carry strategy, forward-looking measures of expected returns are used to evaluate the attractiveness of assets on a risk-return basis. For example, a foreign exchange carry trade may involve the purchase of a currency with a high-yield interest rate and funding it with a currency with a lower-yield interest rate. For the most part, positions are entered on a relative-value basis, and so are

insensitive to broad market moves. Diversification is achieved by investing in a broad range of assets across bonds and currency and interest rate swaps.

Alternative Credit

The Fund may also seek to take exposure to "alternative credit" strategies by investing in the asset classes as described in further detail below.

- a) *High Yield.* High Yield bonds are bonds issued by companies and have below investment grade ratings. As a result, they are often excluded from traditional balanced portfolios that include investment grade corporate bonds. As a result of the below investment grade rating, high yield bonds generally have a higher yield given the relatively higher level of credit risk associated with the issuing companies.
- b) *Securitised Credit.* Securitised bonds include mortgage backed and other asset backed securities issued by mortgage agencies or corporations (and which may include collateralised debt obligations ("CDOs"), which are structured as either collateralised loan obligations ("CLOs) or collateralised mortgage obligations ("CMOs")). These assets are given the title 'securitised' as they are secured on underlying assets such as a collection of properties or car loans.
- c) *Convertible Bonds.* Convertible bonds, including contingent convertible bonds, are bonds issued by corporations that have the option to convert into equity securities contingent on certain conditions being met.
- d) *Emerging Market Debt.* Emerging Market Debt includes bonds issued by emerging market companies or countries. They can have investment grade or below investment grade ratings. These bonds can be issued in US Dollars or in local currency.

The asset classes above are regarded as "alternative credit" strategies as an investment in them offers a different risk and return profile than an investment in a traditional developed market sovereign or corporate fixed income issuer. The Investment Manager will allocate to the above strategies based upon its evaluation of which combination offers the optimal mix of investment yield compared to the risk attached to such investment. This may include an assessment of the issuers or sectors whose debt underlies the credit exposure obtained. For example, the Fund may increase its exposure to emerging market debt at times of increased globalisation of trade and consequent development opportunities for emerging markets, subject always to an overall limit of 20% of Net Asset Value being exposed to emerging markets. Conversely, if there is a movement towards increased protectionism in developed markets, which might impact on trade opportunities in emerging markets, the Investment Manager may invest instead in high-yield bonds or securitised credit as an option for increase yield in an appropriately risk- controlled environment.

The Fund shall not invest directly in any of the instruments referred to above and shall only take exposure to such strategies through investments in Underlying Funds.

The Fund's aggregate exposure to CDOs (whether by way of investment in CLOs, CMOs or a combination thereof) shall not exceed 10% of Net Asset Value. The CMOs to which the Fund takes exposure differ from CLOs in that they shall have the benefit of the security granted to the initial lender(s) under the mortgages included in the relevant reference portfolio.

Real Asset Strategies

The real asset strategies to be pursued by the Fund will include the following.

Listed Real Asset Securities

The Fund may gain exposure to real estate, infrastructure and natural resources strategies through investment in real estate securities, listed infrastructure and listed natural resource equities. Companies in these sectors exhibit relatively low correlation to the global equity market. They can also have longer term inflation hedging characteristics given the nature of the cash flows generated by the underlying assets owned by the companies.

Commodities

The Fund may seek to take a view in relation to commodity markets through permitted investment in Underlying Funds, eligible index derivatives or UCITS eligible exchange traded securities, each as described in further detail below in the section titled "*Exposure to Commodities*".

Inflation Linked Bonds

The Fund may invest in inflation-linked bonds issued by sovereign issuers, which provide investors with protection against inflation in addition to the ordinary yield in respect of investment in a nominal bond issued by same country. An inflation-linked bond explicitly provides investors with compensation for inflation, which is achieved by linking the principal amount of the bond to a specific inflation index.

REITs

The Fund may also invest in REITs (either directly or through Underlying Funds) listed on Recognised Markets, including without limitation, the London Stock Exchange, the New York Stock Exchange, the Irish Stock Exchange, the Hong Kong Stock Exchange, the Australian Stock Exchange, the Tokyo Stock Exchange and the Singapore Stock Exchange. REITs may be open-ended or closed ended, provided that they otherwise meet UCITS eligibility requirements. The Fund may invest in unlisted REITs but such allocations will be subject to the overall 10% investment limit in unlisted transferable securities. The Investment Manager will only invest in REITs where it believes that such investment will continue to provide the level of liquidity to Shareholders referred to in the Prospectus and this Supplement.

Investment in Underlying Funds

The Fund will invest in Underlying Funds which invest in strategies which focus on providing exposure to alternative or real assets and financial derivative instruments based on such securities.

The Fund will typically invest between 51% and 100% of Net Asset Value in Underlying Funds.

In selecting Underlying Funds, the Investment Manager will have regard to market opportunities and risks, valuations (absolute, historic and relative), technical and fundamental indicators, including global or macroeconomic factors which may drive movement of securities within a given market. These may include factors such as interest rates, regional growth, inflation, commodity prices or other relevant factors.

Once the Investment Manager has determined the market to which it wishes to obtain exposure, it will evaluate the universe of Underlying Funds in order to determine which offers the best method of accessing such market. The Investment Manager will have regard to how Underlying Funds have performed through different market cycles. The Investment Manager will review the manner in which a target Underlying Fund has been managed and will have regard to the experience of the relevant portfolio manager(s), their risk appetite, their adherence to stated investment strategies and to their communications and reporting to the market and to their existing investors. While the Investment Manager will have regard to historical performance, it retains the ability to invest in more recently established Underlying Funds, where it believes that other factors, such as experience of the investment team, investment strategy, cost, liquidity or other relevant factors to outweigh the absence of a significant track record.

In monitoring returns and selecting appropriate investments, the Investment Manager will track Underlying Funds' performance against the Underlying Fund's own stated objectives, external benchmarks (e.g. an active global inflation-linked bond fund may be reviewed on its ability to outperform the Bloomberg World Government Inflation Linked All-Maturities Index and peer managers). In general, the Investment Manager's monitoring activities represent a continuation of the analysis process conducted prior to initial investment in an Underlying Fund. As part of this monitoring process, various risk reports are utilised, assessing the Underlying Fund's current leverage, liquidity of positions and geographic exposure.

Use of Active or Passive Underlying Funds

The Investment Manager will typically select Underlying Funds with passive investment strategies, including certain exchange traded funds (“**ETFs**”) or index tracker funds in circumstances where the relevant Underlying Fund fully captures the investment exposure the Investment Manager requires, or where the relevant Underlying Fund tracks a market which is considered by the Investment Manager to be efficient (for example, exposure to global real estate companies). This is on the basis that the Investment Manager believes that market efficiency will constrain the ability of individual Underlying Fund managers to produce returns in excess of a relevant benchmark tracking that market. In such circumstances, the Investment Manager believes that Underlying Funds that track or replicate an approved index in respect of such markets will provide low-cost exposure to general movements of securities within such markets.

Underlying Funds with active strategies will be used where the Investment Manager believes that markets are less efficient or are under-researched (for example, hedge fund strategies). In such circumstances, the Investment Manager believes that the ability to produce returns in excess of those available through investment in a broad-based model index is more achievable.

In determining whether an Underlying Fund with an active or passive strategy is to be used, the Investment Manager will also have regard to factors such as fees, ease of acquiring and disposing of interests in the relevant Underlying Fund and the investment process and philosophy of the manager of the relevant Underlying Fund

Investment Instruments and Asset Classes

Underlying Funds

The Fund may invest in shares of investment funds including regulated open-ended collective investment schemes, such as investment companies, investment limited partnerships, unit trusts, common contractual funds or their equivalents. The Fund may invest in other Funds of the Company.

The Underlying Funds in which the Fund may invest will typically be authorised in the European Union under the UCITS Directive. The Fund may also invest in alternative investment funds (“**AIFs**”) in accordance with the requirements of the Central Bank. Such eligible AIF schemes are:

1. schemes established in Guernsey and authorised as Class A Schemes;
2. schemes established in Jersey as Recognised Funds;
3. schemes established in the Isle of Man as Authorised Schemes;
4. regulated alternative investment funds (“**AIFs**”) authorised by the Central Bank provided such AIFs comply in all material respects with the provisions of the Central Bank UCITS Regulations; and
5. regulated AIFs authorised in a Member State of the EEA, the UK, the US, Jersey, Guernsey or the Isle of Man and which comply, in all material respects, with the provisions of the Central Bank UCITS Regulations.

The consideration of “all material respects” will include, inter alia, consideration of the following: (a) the existence of an independent trustee/custodian with similar duties and responsibilities in relation to both safekeeping and supervision; (b) requirements for the spreading of investment risk including concentration limits, ownership restrictions, leverage and borrowing restrictions, etc.; (c) availability of pricing information and reporting requirements; (d) redemption facilities and frequency; and (e) restrictions in relation to dealings by related parties.

The Fund may also invest in REITs as described above.

No more than 30% (in aggregate) of the Net Asset Value of the Fund may be invested in eligible AIF Underlying Funds.

No more than 20% of the Net Asset Value of the Fund may be invested in any one collective investment scheme.

Direct Investment

The Fund may gain direct exposure to equities, investment grade fixed or floating rate government bonds, closed-ended funds which are listed or traded on Recognised Markets worldwide and money market instruments (as described in further detail below).

In addition, the Fund may invest up to 10% of its net assets in unlisted transferable securities including closed-ended investment funds which comply with the eligibility criteria for UCITS.

Exposure to Commodities

Indirect exposure to commodities may be sought through investment in eligible index derivatives and Underlying Funds. The Fund may also gain exposure to the asset classes described above via exchange traded securities described below which are listed or traded on Recognised Markets worldwide. Such exchange traded securities shall not embed any derivatives. Exchange traded commodities (“ETCs”) are debt securities typically issued by an investment vehicle that tracks the performance of a single underlying commodity or a group of associated commodities, including inter alia gold, silver, platinum, diamonds, palladium, uranium, coal, oil, gas, copper and crop. ETCs are liquid securities and may be traded on a regulated exchange in the same way as an equity. ETCs enable investors to gain exposure to commodities without trading futures or taking physical delivery of assets. ETCs invested in by the Fund shall not embed any derivatives or leverage. Investments via ETCs will not exceed 20% of the net assets of the Fund.

Cash and Cash Equivalents

The Fund may also retain amounts in cash or cash equivalents (including but not limited to deposits, money market instruments, short-term debt obligations and treasury bills listed or traded on Recognised Markets) pending reinvestment or for ancillary liquidity purposes or margin requirements in connection with the Fund’s investments in financial derivative instruments described below or in extraordinary market circumstances which may require a defensive investment strategy such as a market crash or major crises which in the reasonable opinion of the Investment Manager would be likely to have a significant detrimental effect on the performance of the Fund (and in such circumstances, the Fund may move up to 100% of net assets into such cash or cash equivalents).

The money market instruments and other short term debt obligations the Fund may utilise for investment or efficient portfolio management purposes may include, without limitation, short term commercial paper, bankers’ acceptances, government securities and certificates of deposit, securities issued by or on behalf of or guaranteed by the government of the U.S. or by other OECD sovereign governments or by their sub-divisions or agencies and securities issued by public corporations, local authorities, banks or other financial institutions or corporate issuers. They may also include shares in money market funds subject to the conditions and limits set out in the Central Bank UCITS Regulations.

Use of Financial Derivative Instruments

The Fund may use exchange traded and OTC derivatives for investment and/or efficient portfolio management purposes.

The aim of any derivative used for such reasons is not to materially alter the risk profile of the Fund, but rather to assist the Manager in meeting the investment objective of the Fund as set out above.

The Fund may gain exposure to currency forwards, futures contracts, options on futures contracts, options on direct securities and covered warrants as outlined in further detail below. Each of these derivatives may be exchange traded and listed on a Recognised Market globally or over the counter.

Currency Forwards: These may be used for performance enhancement and hedging purposes in order to protect the Fund against adverse movements between the currencies in which investments within the

Fund may be denominated and the Base Currency of the Fund. Where the Fund engages in foreign exchange transactions which alter the currency exposure characteristics of its investments the performance of the Fund may be significantly influenced by movements in exchange rates as currency positions held by the Fund may not correspond with the securities positions held.

Futures Contracts: Futures may be used for efficient portfolio management purposes, including the short-term investment of cash balances, pending investment in Underlying Funds or Direct Investments in the manner outlined above. A large inflow of cash may result in the Fund being underexposed to the market. Entering into Futures contract in place of immediate purchase of Underlying Funds may be done on a temporary basis until a more optimal time to purchase the relevant Underlying Fund or Direct Investment is ascertained. Any securities or indices to which exposure is obtained through futures will be consistent with the investment policies of the Fund.

Options: Put options may be purchased to protect the value of the Fund or a portion of the Fund from expected sharp downside movements in respect of assets held. In such a case, the purchase of a put option (allowing the Fund to sell a given holding at an agreed price) is less costly or cumbersome as a protective measure than selling out large positions and trying to buy them back. Call options may be used to enhance an existing position if short term strength is expected. Call Options can be purchased or sold to either gain upside exposure to an appropriate index or be sold (covered sale only) to add income from premium dollars received as an investment overlay to an existing long position in the broad market, industry or specific stock holding, respectively The Fund may write and purchase call and put options on any stock or index consistent with the investment policies of the Fund.

Covered Warrants: A covered warrant is a type of investment security issued by a financial institution that gives the holder the right, but not obligation, to buy or sell an underlying asset at a specified price on or before a specified date. Covered warrants can have single stocks, indexes or currencies as their underlying assets. In the context of its ability to make equity investments as part of its Direct Investment strategy, the Fund may invest in covered warrants issued by a reputable broker and listed on or dealt in a Recognised Market in order to gain exposure to a basket of equities in a more efficient form than could be obtained by buying the equities directly, this might be because of a reduction in transaction costs, improved liquidity or lower tax. Covered Warrants may also be used to enhance an existing position if short-term strength is expected.

Sustainable Finance Disclosures

Article 4 of SFDR

In accordance with the discretion granted pursuant to Article 4(1)(b) of SFDR, the Manager does not currently consider the principal adverse impacts ("**PAI**") of investment decisions on sustainability factors or issue a statement on its website, in relation to the due diligence policies with respect to those impacts (either generally at the level of the Manager or specifically in respect of the Fund). This is due to the lack of information and data available to adequately assess the full range of adverse impacts, the nature and scale of the Manager's activities and the wide and varied range of financial products which it makes available. The Manager will continue to review its position in relation to the consideration and publication of adverse impacts and, if it determines at a future date to provide such information, this Supplement and the Manager's website shall be updated accordingly.

Similarly, the Investment Manager and the ICAV do not consider the adverse impacts of investment decisions at entity level or in respect of the Fund, although the Investment Manager may from time to time have regard to some, but not all, PAIs as a mechanism to (a) measure and test the environmental and social characteristics of investments and (b) analyse the potential negative impact of underlying investments on certain environmental or social objectives.

Article 6 of SFDR

In accordance with Article 6 of SFDR the Company and the Manager are obliged to disclose (a) the results of the assessment of the likely impacts of sustainability risks on the returns of the Fund, and (b) the manner in which sustainability risks are integrated into investment decisions.

Assessment of the Impact of Sustainability Risks on the Fund

The Prospectus sets out details of the sustainability risks applicable to the various Funds of the Company, including the Fund, under the section headed “Disclosures under SFDR - Assessment of the Impact of Sustainability Risks on the Funds”.

The investments of the Fund are primarily made into Underlying Funds. Investment into open-ended collective investment schemes is understood to carry low sustainability risk as such are composed of a diversified base of underlying investments. Should the market value of an underlying investment be impacted by sustainability risk, the wider impact on the Underlying Fund should be limited. This diversification curtails the sustainability risk of the Fund. As a result, the Fund has been determined to have a sustainability risk rating of low. The degree of sustainability risk is likely to vary to a limited extent should the composition of the portfolio be modified.

Integration of Sustainability Risk into Investment Decisions

The Investment Manager does not operate a risk framework that is specifically tailored to sustainability risks. Rather relevant sustainability risks may be considered as part of the processes adopted by the Investment Manager to monitor and manage general market risks. Accordingly, the Investment Manager may integrate sustainability risks in its investment decision making process by having regard to material sustainability events that cause or are reasonably expected to cause broad disruption to economic growth, investor sentiment and asset flows in its ongoing assessment and monitoring of financial markets and the investment risk profile of the Fund.

The Investment Manager may utilise proprietary and/or third-party tools and research to assess and monitor market risks that are relevant to the Fund.

Article 6 of the Taxonomy Regulation

The Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. The Taxonomy Regulation also obliges the Manager to disclose how and to what extent the investments of each Sub-Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria. In order for an investment to qualify as environmentally sustainable under the Taxonomy Regulation as at the date hereof, it must meet a number of different criteria, including that it contributes substantially to an environmental objective, as measured using the Technical Criteria and that it must not significantly harm any of the environmental objectives set out in the Taxonomy Regulation.

As the Fund is not an Article 8 or Article 9 Fund under SFDR, investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities as set out in the Taxonomy Regulation.

Investment Restrictions

Please refer to the “Investment Restrictions” at Appendix D of the Prospectus for more information with regard to investment restrictions of the Fund.

Borrowing and Leverage

The Fund will only use a limited number of simple derivative instruments for investment and/or efficient portfolio management.

The Manager employs a risk management process which enables it to accurately measure, monitor and manage the various risks associated with the Fund’s use of derivative instruments. The Fund will use the Commitment Approach to calculate the global exposure generated through the use of financial derivative instruments as part of the Manager’s risk management process.

The leverage generated through the use of financial derivative instruments will not exceed 100% of the Net Asset Value of the Fund

The Fund may borrow up to 10% of its Net Asset Value on a temporary basis only in order to settle investor redemptions.

Securities Lending and Securities Financing Transactions

The Fund will not enter into securities lending or securities financing transactions such as stocklending, repurchase or reverse repurchase agreement and shall not enter into any total return swaps.

Long-Short Investment Exposure

The Fund may at any time have either long or short investment exposure to the asset classes described above (which may include simultaneous long exposures in respect of certain reference assets and short exposures in respect of other reference assets), depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. However, it is generally intended that the Fund will primarily be net long (i.e., the long positions will be in greater proportion than the synthetic short positions).

The Fund will only take long exposure for investment purposes. The maximum anticipated long exposure of the Fund is 110% of the Net Asset Value (100% direct investment and 10% leveraged exposure.) The Fund may take short exposures for hedging purposes only and the maximum anticipated exposure in this regard is 5% of its Net Asset Value.

Research Charges and Research Payment Accounts

The Company has agreed to pay Research Charges in respect of the Fund into a Research Payment Account which will be used to purchase third party materials and services ("**Research**") on behalf of the Fund. Details of the total Research Charges paid in respect of the Fund will be disclosed in the annual report of the Company.

Further information in relation to the operation of the Research Payment Account, including the research budget agreed in respect of a given period is set out in full on the Investment Manager's website at www.pacificam.co.uk.

RISK CONSIDERATIONS

There can be no assurance that the Fund's investments will be successful or that the investment objectives of the Fund will be achieved. Investors should be aware of the risks of the Fund including, but not limited to, the risks described in the "Risk Considerations" section of the Prospectus and below. An investment in the Fund is suitable only for persons who are in a position to take such risks.

No Operating History; No Reliance on Past Performance

The Fund has no operating history upon which prospective investors can evaluate its likely performance. The past investment performance of the Manager and the Investment Manager should not be construed as an indication of the future results of the Manager, the Investment Manager and their affiliates or the Fund. The results of other investment funds formed and accounts managed by the Manager and the Investment Manager, currently or in the past, which have or have had investment policies that are different from or similar to the investment policies of the Fund, are not indicative of the results that the Fund may achieve. The Fund may make investments in different portfolios or in similar portfolios of securities. Accordingly, the Fund's results may differ from, or be similar to, and are independent of the results previously obtained by the Manager, the Investment Manager and those investment funds and accounts. Further, the Fund and its method of operation may differ in several respects from other investment vehicles or accounts managed by the Manager and the Investment Manager; e.g., there are different investment and return objectives and investment allocation strategies and, in certain cases, investment techniques.

Fund of Fund Risk

Identifying appropriate Underlying Funds for investment by the Fund may be difficult and involves a high degree of uncertainty. In addition, certain Underlying Funds may be, from time to time, oversubscribed, and it may not be possible to make investments that have been identified as attractive opportunities. Although the Investment Manager will receive detailed information from the manager of each Underlying Fund regarding its historical performance and investment strategy, in most cases the Investment Manager has little or no means of independently verifying this information. The manager of an Underlying Fund may use proprietary investment strategies that are not fully disclosed to the Investment Manager, which may involve risks under some market conditions that are not anticipated by the Investment Manager. For information about the net asset value and portfolio composition of an Underlying Fund, the Investment Manager will be dependent on information provided by the Underlying Funds, which, if inaccurate, could adversely affect the Investment Manager's ability to manage the assets of the Fund in accordance with its investment objective, and to value accurately the Net Asset Value of the Fund. Shareholders have no individual rights to receive information about Underlying Funds or the managers of those Underlying Funds, will not be investors in the Underlying Funds and will have no rights with respect to or standing or recourse against, the Underlying Funds, the managers of the Underlying Funds, or any of their affiliates.

Shareholders will bear a proportionate share of the fees and expenses of the Fund, including operating costs and distribution expenses, and, indirectly, the fees and expenses of the Underlying Funds.

Investment decisions of the Underlying Funds are made by the managers of those Underlying Funds entirely independent of the Investment Manager, and of each other. As a result, at any particular time, one Underlying Fund may be purchasing securities of an issuer whose securities are being sold by another Underlying Fund. Consequently, the Fund could incur indirectly certain transaction costs without accomplishing any net investment result.

The Underlying Funds in which the Fund may invest may utilize leverage in their investment programs. Such leverage may take the form of loans for borrowed money, trading on margin, derivative instruments that are inherently leveraged, including among others forward contracts, futures contracts, swaps and repurchase agreements, and other forms of direct and indirect borrowings, increasing the volatility of the Underlying Fund's investments. The use of leverage by the Underlying Funds may substantially increase the adverse impact to which the investment portfolios of the Underlying Funds may be subject.

The level of interest rates generally, and the rates at which the Underlying Funds can borrow in particular, can affect the operating results of the Underlying Funds.

Please see the “Investment Objective and Policies” and the general “Risk Considerations” sections of the Prospectus for further details.

Fund of Funds – Multiple Levels of Fees and Expenses

To the extent that any of the Underlying Funds invest in other collective investment schemes, investors will be subject to higher fees arising from the layered investment structure as fees may arise at three levels; the Fund, the Underlying Fund and the funds in which the Underlying Fund invests. This investment structure may also result in a lack of transparency with respect to investments in which the Fund has an indirect interest.

For further information in this regard, please see the sections headed “Fees and Expenses - Underlying Funds” and “Fees and Expenses - Establishment and Underlying Funds Managers’ Fees” below.

Valuation of Underlying Funds

Although the Investment Manager expects to receive detailed information from the investment manager of each Underlying Fund regarding its investment performance on a regular basis, the Investment Manager may have limited access to the specific underlying holdings of the Underlying funds and little ability to independently verify the information that is provided by the investment managers of the Underlying Funds. In the event of an error in the determination of the value of an investment in an Underlying Fund, the Net Asset Value of the Fund may be inaccurate.

Further, from time to time, when valuing the assets of the Fund, units or shares in Underlying Funds may be valued at their latest available net asset value as published by the collective investment schemes as at the Valuation Point, or, if unavailable at the probable realisation value, as estimated with care and in good faith and as may be recommended by a competent professional appointed by the Manager, the Investment Manager and approved for the purpose by the Depository. Therefore, it is possible that from time to time the value of the units or shares in Underlying Funds used in the valuation of the Fund as at the Valuation Point may not accurately reflect the actual net asset value of such Underlying Funds as at the Valuation Point and may result in “stale pricing” of Underlying Funds.

Custody Risks

The Depository may appoint sub-custodians in certain jurisdictions to hold assets of the Fund. Subject and without prejudice to the terms of the Depository Agreement (which provides that the Depository will be liable for the loss of any assets held in custody, save where it can prove that the loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary), the Depository may not be responsible in certain circumstances for cash or assets which are held by sub-custodians in certain jurisdictions, nor for any losses suffered by the Fund as a result of the bankruptcy or insolvency of any such sub-custodian (ie, the losses occur in circumstances which are due to external events outside the reasonable control of the Depository). The Fund may have a potential exposure on the default of any sub-custodian. In such event, many of the protections that would normally be provided to a customer by a depository may not be available to the Fund. Custody services in certain emerging markets jurisdictions remain undeveloped, and accordingly there are transaction and custody risks of dealing in certain emerging markets jurisdictions. Specific markets where such custody risks may arise for the Fund include China, Hong Kong, Indonesia, South Korea, Malaysia, Philippines, Singapore, Taiwan and Vietnam. Given the undeveloped state of regulations on custodial activities and bankruptcy in certain emerging markets jurisdictions, the ability of a Fund to recover assets held by a sub-custodian in the event of its insolvency would be in doubt.

Exchange Traded Funds (“ETFs”)

ETFs are issuers whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index. ETFs, like mutual funds, have expenses associated with their operation, including advisory fees. When the Fund invests in an ETF, in

addition to directly bearing expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses. Such ETF's expenses may make owning shares of the ETF more costly than owning the underlying securities directly. The risks of owning shares of an ETF generally reflect the risks of owning the underlying securities the ETF is designed to track, although lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio of securities.

Real Estate Investment Trust Securities ("REITS")

The Fund may invest in REITs which are pooled investment vehicles that invest primarily in either real estate or real estate related loans. There are particular risks associated with the direct ownership of real estate by REITs in which the Fund may invest. For example, real estate values may fluctuate as a result of general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighbourhood values, changes in how appealing properties are to tenants and increases in interest rates. As well as changes in the value of their underlying properties, the value of REITs may also be affected by defaults by borrowers or tenants.

Furthermore, REITs are dependent on specialised management skills. Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flows to make distributions to shareholders or unitholders, and may be subject to defaults by borrowers and to self-liquidations. In addition, the performance of a U.S regulated REIT may be adversely affected if it fails to qualify for tax-free pass-through of income under U.S. tax law or if it fails to maintain exemption from registration under the U.S. Investment Company Act 1940, as amended. REITs may be open-ended or closed-ended and, where they are not listed on a Recognised Market, will be subject to the overall 10% limit on investment in unlisted transferable securities.

Special Risks of Fund of Funds

Since the Fund may make investments in or effect withdrawals from an Underlying Fund only at certain times pursuant to limitations set forth in the governing documents of the Underlying Fund, the Fund from time to time may have to invest a greater portion of its assets temporarily in money market securities than the Investment Manager otherwise might wish to invest, the Fund may not be able to withdraw its investment in an Underlying Fund promptly after it has made a decision to do so, and the Fund may have to borrow money to pay redemption proceeds. This may adversely affect the Fund's investment return.

INVESTOR PROFILE

The Company has been established for the purpose of investing in transferable securities in accordance with the UCITS Regulations. The investor base is expected to consist of clients of Lockhart seeking capital growth over the long-term, with the benefit of an ongoing full financial planning, financial advice and modelling services from Lockhart.

DIVIDEND POLICY

It is anticipated that dividends may be paid in respect of the Distributing Classes (i.e, those Share Classes which have the word “Distributing” in their name.

Under normal circumstance, any such distributions will be paid from the net income attributable to the relevant Share Class.

The dividend distribution dates of the Fund are set out below.

Ex-Dividend Date	For Distribution By
First Business Day in January	Last Business Day in January
First Business Day in July	Last Business Day in July

Further details in relation to Distributing and Accumulating Share Classes are set out in the section of the Prospectus titled “Distribution Policy”.

Payment of such distributions will be made by transfer in accordance with the bank account details nominated by the Shareholder in the Subscription Agreement.

FEES AND EXPENSES

Please see the "Fees and Expenses" section of the Prospectus for details of the fees and expenses of the Company. The following fees and expenses apply in respect of the Fund.

Investment Management Fees

Retail Share Classes

The Investment Manager will receive an investment management fee (the "**Investment Management Fee**") in respect of each Retail Share Class for management services to the Fund, equal to an annualized rate of up to 1.50% of the NAV attributable to each Retail Share Class.

Institutional Share Classes and Class Z Shares

The Investment Manager will receive an Investment Management Fee in respect of each Institutional Class of Shares for management services to the Fund, equal to an annualized rate of up to 0.75% of the NAV attributable to each Institutional Class of Shares.

The Investment Manager will receive an Investment Management Fee in respect of each Z Class of Shares for management services to the Fund, equal to an annualized rate of up to 0.75% of the NAV attributable to each Z Class of Shares.

General Provisions in relation to Investment Management Fees

The Investment Management Fee payable to the Investment Manager is accrued daily and paid monthly, in arrears out of the assets of the Fund.

For purposes of calculating the Investment Management Fee for any Business Day, the NAV of the Fund attributable to a Class is determined by or under the direction of the Directors, based on the Fund's NAV as of the close of the prior Business Day adjusted to reflect any applicable redemptions and subscriptions.

Notwithstanding the foregoing, the Investment Manager may, in its sole discretion, during any period, elect to waive a portion of its fees with respect to the Fund or any Class without notice to Shareholders.

The Company will also reimburse the Investment Manager for reasonable out-of-pocket expenses incurred out of the assets of the Fund.

Administration and Custody fees

The Fund will be subject to an administration fee in relation to administration services provided by the Administrator to the Fund and to a custody fee in relation to the services provided by the Depositary to the Fund.

The fees payable to the Administrator and Depositary have fixed and variable elements dependent on assets under management and Fund activity.

The Administrator will be entitled to receive out of the assets of the Fund a maximum variable annual fee of 0.02% per annum of the Net Asset Value of the Fund, subject to a minimum annual fee of USD 25,000 per annum. This minimum fee may be waived by the Administrator for such period or periods of time as may be agreed between the Company and the Administrator from time to time.

The Depositary shall be entitled to a fee of up to 0.0125% per annum of the Net Asset Value of the Fund in respect of its oversight function, subject to a minimum annual fee of USD 15,000 per annum. This minimum fee may be waived by the Depositary for such period or periods of time as may be agreed between the Company and the Depositary from time to time. The Depositary is also entitled to be reimbursed out of the assets of the Fund for any safekeeping fees, sub-custodian fees in respect of any custodian appointed by it as well as agreed upon transaction charges (all such charges being at normal

commercial rates). The Depositary will be entitled to additional fees to be agreed between the parties for the provision of additional services to the Fund.

Other fees and expenses, payable to the Administrator and/or Depositary, include fees in respect of additional Share Class costs, financial reporting, transfer agency, transaction processing fees and fees for tax reclaim services. These fees are at normal commercial rates and are primarily charged on a 'per-transaction' basis.

These fees (plus VAT, if any) will accrue on a daily basis and shall be payable monthly in arrears on the last Business Day of each month.

The Company will reimburse the Administrator for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred out of the assets of the Fund and will also reimburse the Depositary out of the assets of the Fund for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred by the Depositary and for reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary and will be liable for transaction charges. The expenses of the Depositary and Administrator shall accrue on a daily basis and shall be payable monthly in arrears.

Distribution Fee

A distribution fee of up to 0.50% shall apply in respect of Classes in the Fund.

Establishment and Operating Expenses

The Fund's establishment and organisational expenses are not expected to exceed GBP 100,000. These expenses will be amortised over the first five annual accounting periods of the Fund or such shorter period as the Directors, in consultation with the Manager, may determine. The effect of this accounting treatment is not expected to be material to the financial statements of the Company. If the effect of the accounting treatment becomes material in the future, there may be a requirement to write off the unamortised balance of establishment and organisational costs, which will be reflected in the Net Asset Value of the Fund.

Expenses as may arise will be allocated to the Fund when, in the opinion of the Directors, after consultation with the Manager, they relate to the Fund. If an expense is not readily attributable to any particular Fund, the Directors, in consultation with the Manager, shall determine the basis on which the expense shall be allocated between the Funds of the Company. In such cases, the expense will normally be allocated to Funds pro rata to the value of the Net Asset Value of the relevant Fund. Accordingly, in such cases the Fund will bear its proportionate share of such expenses. To the extent that expenses are attributable to a specific Class of the Fund, that Class shall bear such expenses.

Certain other costs and expenses incurred in the operation of a Fund will be borne out of the assets of the Fund including, without limitation, registration fees and other expenses relating to regulatory, supervisory or fiscal authorities in various jurisdictions, maintaining the Fund and the Shares with any governmental or regulatory authority or with any regulated market or exchange; compliance services, updating, writing, typesetting and printing the Prospectus, Supplement, Key Information Document, sales, literature and other documents for investors; the preparation of industry reporting templates (such as the European MiFID template, European EST Template or equivalent documents) for investors, taxes, commissions and brokerage fees; issuing, purchasing, repurchasing and redeeming Shares; transfer agents, company secretarial fees and expenses, anti-money laundering reporting officer fees and expenses; dividend dispersing agents, Shareholder servicing agents and registrars; printing, mailing, auditing, accounting and legal expenses; reports to Shareholders and governmental agencies; meetings of Shareholders and proxy solicitations therefore (if any); proxy voting and investment stewardship advisory services; insurance premiums; association and membership dues; and such non-recurring and extraordinary items as may arise (the "**Establishment and Operating Expenses**").

The Investment Manager and/or any distributor appointed in respect of the Fund may, from time to time and at its sole discretion, use part or all of the fees it receives to remunerate certain financial intermediaries. In addition, the Investment Manager and/or the distributor may, from time to time and at its sole discretion, rebate any or all of its fees to some or all Shareholders.

Underlying Funds

Each Underlying Fund will bear its own offering, establishment, organisational, and operating expenses, including any administration, custody and valuation fees payable by the Underlying Fund and any management and performance incentive fees payable to the manager and/or investment manager of the Underlying Fund pursuant to the Underlying Fund's offering documents and material contracts which will be in addition to the Fund's fees and expenses. The fees which are expected to be payable to the Underlying Fund managers in the section headed "*Underlying Funds Manager's Fees*" below. The Fund will indirectly bear a *pro rata* portion of the fees and expenses of each Underlying Fund as an investor in that Underlying Fund. The Fund will also bear any subscription fee, redemption fee or sales charge payable in respect of its investment in an Underlying Fund.

Where an Underlying Fund invests in other collective investment schemes, the Underlying Fund and in turn the Fund, may bear a portion of the fees and expenses of the collective investment schemes in which the Underlying Fund invests. The Underlying Fund will bear any subscription fee, redemption fee or sales charge payable in respect of any of its investments in collective investment schemes and the Fund will indirectly bear a *pro rata* portion of such fees and charges. The Fund may not invest in an Underlying Fund which invests in excess of 10% of such Underlying Fund's net asset value in further collective investment schemes.

Any manager of an Underlying Fund in which the Fund invests, which is an affiliate of the Investment Manager, will waive any preliminary charge, initial charge or redemption charge which it is entitled to charge in respect of investments made by the Fund in that Underlying Fund.

Underlying Funds Manager's Fees

Managers to Underlying Funds, and to the collective investment schemes in which the Underlying Funds may invest, are compensated on terms that may include fixed and/or performance-based fees or allocations. The Fund, as an investor in an Underlying Fund, will bear a *pro rata* portion of any fixed management fees payable to an Underlying Fund's manager, and an indirect *pro rata* portion of any fixed management fees of any collective investment schemes in which the Underlying Funds may invest. It is currently expected that the weighted average management fees payable to an Underlying Fund manager or the manager of collective investment schemes in which the Underlying Fund invests will be approximately 1% (and will not exceed 1.5%) of an Underlying Fund's assets.

In addition, a performance fee may be payable to managers of certain Underlying Funds or of the collective investment schemes in which the Underlying Fund invests, and it is currently expected that these will generally range from 0% to a maximum of 20% of the increase in net asset value of the assets allocated to an adviser over the period of such allocation, deducted from the assets of the relevant Underlying Funds or collective investment schemes in which the Underlying Fund invests and thereby reducing the actual performance of such Underlying Funds. The performance fee may also be subject to minimum hurdle rates of return.

Where investment is made by the Fund in another Fund (the "Receiving Fund") of the Company, any commission (including a rebated commission) received by the Investment Manager in respect of such investment will be paid into the assets of the Fund. Such assets of the Fund which are invested in a Receiving Fund will, however, be subject to their proportionate share of the fees and expenses of the Receiving Fund in which they are invested. Where the Fund invests in a Receiving Fund, the rate of the annual management fee which Shareholders are charged in respect of that portion of the Fund's assets invested in Receiving Funds (whether such fee is paid directly at Fund level, indirectly at the level of the Receiving Funds or a combination of both) shall not exceed the rate of the maximum annual investment management fee which investors in the Fund may be charged in respect of the balance of the Fund's assets, such that there shall be no double charging of the annual investment management fee to the Fund as a result of its investments in the Receiving Fund.

SUBSCRIPTION AND REDEMPTION OF SHARES

Eligible Investors

Subject to the section “Transfer of Shares” in the Prospectus, applicants will generally be obliged to certify that they are not U.S. Persons.

The Company and the Administrator reserve the right to reject in whole or in part any application for Shares. Where an application for Shares is rejected, the subscription monies will be returned to the applicant within 14 days of the date of such application at the applicant's cost and risk and no interest or other compensation will be payable in respect of such returned monies.

Minimum Subscription

Unless otherwise determined by the Company, the minimum initial subscription for each class of Share is as disclosed in “*The Fund*” section of this Supplement.

Minimum Holding

A Shareholder may not make a partial redemption of Shares which would result in less than the minimum holding amount, specified for the relevant class of Shares as disclosed in “*The Fund*” section (or its Class Currency equivalent) unless otherwise determined by the Company.

In the event that a Shareholder requests a partial redemption of their Shares which would result in such Shareholder holding less than the minimum holding amount above, the Company may, in its sole discretion (a) treat such redemption request as a redemption of the relevant Shareholder's entire holding of the relevant Class of Shares; (b) reject such partial redemption request; or (c) accept such partial redemption request. Shareholders will be notified before or after the relevant Dealing Day in the event that the Company determines to (i) treat such redemption request as a redemption of the relevant Shareholder's entire holding of the relevant Class of Shares or (ii) reject such partial redemption request.

Where the value of a Shareholder's Shares has fallen below the minimum holding requirement due to a decline in the NAV of the Fund or an unfavourable change in currency rates, this will not be considered to be a breach of the minimum holding requirement.

Initial Offer Price

Shares in each Class will be available at the initial offer price as set out below which will commence at 9:00 am (Irish Time) on 7 October 2024 and will end at 5:00 pm (Irish Time) 4 April 2025 or such other date and / or time as the Directors may determine and notify to the Central Bank (the “**Initial Offer Period**”).

No Shares have launched as at the date of this Supplement. Shareholders may request up to date information from the Administrator or the Investment Manager as to which Classes have launched at the date of their proposed investment.

The initial offer price for each Share Class will be determined by the currency in which such Class is denominated and as set out in the table below.

Currency of the Share class	Initial offer price
USD	USD 10
GBP	GBP 10
EUR	EUR 10

Subscription monies must be paid in the Class Currency and must be paid by wire transfer to the bank account of the Fund. Money must be remitted from an account in the name of the investor(s).

Offer of Shares after the Initial Offer Period

After the initial issue of Shares in any Class, the Shares in such Class will be issued on the relevant Dealing Day at the relevant Net Asset Value per Share for the applicable Class on the terms and in accordance with the procedures described herein.

Applications for Shares

Applications for Shares in the Fund should be made by written application using the Subscription Agreement available from the Administrator. Subscription Agreements, duly completed together with all supporting documentation in relation to money laundering prevention checks, should be sent to the Administrator, in accordance with the instructions contained in the Subscription Agreement, prior to the Subscription Cut-Off Time, unless the Manager, in consultation with the Company, determines to accept such subscriptions in exceptional circumstances and provided that such subscriptions for Shares are received before the Valuation Point on the relevant Dealing Day. Subscription Agreements may be sent by facsimile to the Administrator. Subsequent purchases of Shares, following an initial subscription pursuant to a properly completed Subscription Agreement, may be made by completing and submitting a faxed or Approved Electronic Request to the Administrator.

Settlement Period for Subscriptions

Cleared funds representing subscription monies must be received by the Company by 10:00 am (Irish time) on the day falling four Business Days after the relevant Dealing Day.

If cleared funds representing the subscription monies are not received by the Company by the above deadline, or such other time or day as is determined by the Directors from time to time, the Manager, acting in consultation with the Directors, reserves the right to reject the subscription and / or cancel the provisional allotment of Shares, as appropriate. In such an event the investor will indemnify the Company, the Manager, the Investment Manager, the Administrator and any of their respective affiliates for any and all claims, losses, liabilities or damages (including attorneys' fees and other related out-of-pocket expenses) suffered or incurred by any such person as a result of the investor not remitting the amount of its subscription by the due date for such subscription or otherwise failing to comply with the terms of such Subscription Agreement.

In the event that the Manager, acting in consultation with the Directors, decides not to cancel a provisional allotment of Shares notwithstanding that cleared funds have been received by the Company after the relevant cut-off time, the Manager reserves the right to charge interest on such subscription monies at prevailing interest rates commencing on the Business Day following the relevant Dealing Day. In addition, upon the failure of a Shareholder to pay subscription monies by the date due, the Manager may, in consultation with the Directors, redeem any Shares held by the Shareholder in the Company and apply the redemption proceeds in satisfaction of the Shareholder's liabilities to the Company, the Manager, the Investment Manager or any of their respective affiliates pursuant to the indemnity described above. Please see "Redemption of Shares – Mandatory Redemption of Shares, Forfeiture of Dividend and Deduction of Tax" in the Prospectus.

The Company, the Manager or the Administrator may, in its sole discretion, reject any subscription in whole or in part without reason.

Shares in the Fund will be issued on the terms and in accordance with the procedures described in the Prospectus.

Redemption Applications

If Redemption Applications on any Dealing Day exceed 10% of the NAV of the Fund, or such higher percentage as the Manager may determine in consultation with the Directors, in respect of any Dealing Day (the "**Gate Amount**"), the Manager may (i) reduce all such Redemption Applications pro rata (in accordance with the size of the Redemption Applications so that Shares redeemed on such Dealing Day, in aggregate, represent only the Gate Amount) and (ii) defer Redemption Applications in excess of the Gate Amount to subsequent Dealing Days, subject to any Gate Amount applicable on any such Dealing Day. Except at the discretion of the Manager, in consultation with the Directors, any such deferred Redemption Application may not be revoked.

Shareholders may request that Shares be redeemed on any Dealing Day by completing and submitting a Redemption Application to the Administrator in accordance with the procedures set out in the Prospectus. Redemption Applications will generally not be accepted after the Redemption Cut-Off Time. Redemption Applications received after the relevant Redemption Cut-Off Time will be held over until the next applicable Dealing Day, unless the Manager determines in consultation with the Directors, in exceptional circumstances and where such Redemption Applications are received before the relevant Valuation Point, to accept such Redemption Applications on the relevant Dealing Day.

Shares will be redeemed at the applicable NAV per Share on the Dealing Day as of which the redemption is effected, subject to any applicable fees associated with such redemption.

Settlement Period for Redemptions

Subject to any provisions contained herein, distributions in respect of redemptions will be paid in full (on the basis of unaudited data) in the applicable Class Currency of the Shares being redeemed normally within four Business Days after the relevant Dealing Day and in any event will not exceed ten Business Days. All payments will be made by transfer to the bank account previously designated by Shareholders for such purpose.

Please note that no redemption payment may be made to a Shareholder until the Subscription Agreement and all documentation required by the Company and the Administrator, including any document in connection with all relevant anti-money laundering legislation or other requirements and/or any anti-money laundering procedures have been completed, has been received by the Administrator.
